WELCH'S SYSTEM

COMBINING

Attendance, Classification, Gradation and Close Supervision

> PUBLISHED BY W. M. WELCH MFG. COMPANY 1516 ORLEANS ST., CHICAGO

> > No. 0943

TO THE TEACHER

This record is furnished with a view to facilitating and improving the system of classification in this county. It will not only be great improvement in the matter of classification but it will also save you a great deal of work. While it would be impossible to print a course of study herein, yet we have given you an outline of the subjects to be taken up in each grade, which will be found very convenient for immediate reference. Classification and gradation of the rural schools is not only one of the most important phases of the work but it is one of the most difficult. It is to aid in this important feature that this record has been rearranged and revised for your benefit.

DEAL HONESTLY.

It would hardly seem necessary to suggest honesty to the teacher, and yet it is to be regretted that many times promotions, grading, etc., are done with but little regard to the ability of the pupils. For the sake of the patrons, pupils, teacher, and all concerned, it is of the highest importance that all examinations, grading of papers, and promotions, be made with the utmost care and honesty. We therefore trust that in making up your record, you will carefully observe this suggestion. It is a great injustice to mark pupils with a mark higher than they have earned.

REPORT TO YOUR SUCCESSORS.

The entire record, to be sure, is a report to your successor, and should be filled out perfectly whether you expect to succeed yourself or not. In making up this record do not pattern after the errors of others, but turn to the model in the front of the book and study and follow it closely. Never use the record of your predecessor as a model. Make up your record completely, systematically, and carefully, and for any general suggestions you may have to offer your successor, you will find space at the foot of the page of your record. You will find, in the back of this book, provisions made for a record of the studies; second of visitors, monthly summary of attendance, etc. Do not overlook this part of the record.

KEEPING RECORDS.

Teachers should keep a temporary record of attendance in the Daily Memo, furnished by the County. Transfer this once a week to the register,

STUDY THE RECORD

While it is of great importance that you make a complete record before leaving school, it is of equally great importance that you study this record on taking charge of a school. The condition of the school cannot be learned at a glance. In making out your program you should consult the record constantly. From it you will learn the number of classes you will have, the size of each class, the time that you will be able to give to each, and a great deal about the individual members of each class. If you assume charge of a school where this record has not been kept, I hope that you will noticy me at once of the fact, giving me the name of the teacher.

REPORTS TO THE COMMISSIONER

Next in importance to properly filling out this record, is the matter of reporting a copy of the same to the county Commissioner. It shall be my purpose to ask for a preliminary report of the organization soon after the school begins. While I shall not ask for a complete report at this time, a very important feature of this report will be the daily program. I shall keep these reports in my office in systematic order for reference so that I can be of assistance to you by offering suggestions on the organization of the school. At the end of the term, I shall expect another report, which should be a duplicate of your classification register, showing the work done and the standing of the pupils during the entire term. You cannot be too careful, in making these reports, because I shall make them permanent records of this office,

Monthly attendance blanks should be mailed promptly at end of each month,

HELPS.

In order that the teacher may be saved the annoyance of collecting all the little helps needed to secure better interest, perfect attendance, and more careful reading of the library, it shall be the purpose of this office to furnish reports to parents, perfect attendance certificates, and diplomas.

REPORTS TO PARENTS.

Since the patrons of the school are the ones most interested in the welfare of their children, they are entitled to know something of the progress and advancement in the work their children are making, to that end the teacher should report at the end of the month the standing of the pupil in school work, attendance, and deportment. Cards for this purpose are furnished by the commissioner's office.

PERFECT ATTENDANCE.

One of the greatest evils that have always confronted the profession is the matter of imperfect attendance. Thousands of pupils all over the state and many of them in this county, remain away from school, day after day, when they should not do so. Tardiness is also a great annoyance to the school. While we may never be able to entirely eradicate these evils, there are devices which greatly aid the teacher necouraging the pupils to be more punctual. One of these is the system of perfect attendance certificates and certificates of award. For the present it shall be the purpose of this office to furnish them to every teacher and I wish to urge you to keep up interest in this matter of attendance even if you have to constantly urge and call their attention to the little diplomas they will receive as a reward for faithful and punctual efforts.

TRUANCY LAW AND TEACHERS RESPONSIBILITY.

State Law: Every child between 7 and 16 years of age must be in daily attendance at school during the entire school year.

Penalty: Any parent, or person in parental relation, convicted of neglect to send, shall be fined \$5,00 to \$50,00 or imprisoned 2 to 90 days, or both.

Excused: (a) A child is excused if he holds an eighth grade diploma.

(b) A child is excused if he is sick and has a statement from a physician that he is physically unable to attend school,

No county, or state official, nor school board has the power to excuse children from attendance at school. Teachers are obliged to report absence, and failure to do so may bring upon them a severe penalty.

CONCLUSION.

Schools capnot attain the highest excellence without the co-operation of all concerned. Teachers need the co-operation of school officers, patrons, and pupils. So does the county Commissioner need the co-operation of the teachers, patrons and school officers as well as the pupils, and when this is accomplished there will be no failure in the work and nothing to prevent the steady and rapid progress of the educational interests of the county.

Trusting that this record may add strength and efficiency to your work, and wishing you abundant success in your efforts, I am,

Yours very truly,

County Commissioner of Schools.

HOW TO CLASSIFY THE SCHOOL

1st. Read the course of study carefully.

2d. Ascertain in which year of the course the pupil has most of his work, and classify him in that year. If he has studies ahead or behind his year, indicate it by writing the number of the year of such irregular studies directly over the standing in said studies. For example, if the pupil is classified in Fifth Year, but has, say Arithmetic, in the Seventh Year, with a standing of 85 per cent, this fact would be noted in the column headed Arithmetic, thus 7/85% (See sample page).

Jd. Leave a space of a few lines blank between the grades for pupils that may enter school later. (See sample page.)

4th. At the close of the first week of the term enter the standings of the pupils as you have determined them, or as taken from the record of the previous term. The first entry will show what each pupil is doing at the opening of school. Write names in ink, and grade in pencil at first, subject to change.

5th. After each term or annual examination the teacher should make an entry in the Register showing the status of each pupil at the close of the term, each being classified in the Division and Year where he is working. The final record at the close of the term being to convey information to succeeding teachers, it should be full and complete. (See Introduction "To the Teacher.")

6th. To indicate in the record more precisely where each pupil belongs in the course of study, see "Syllabus of Classes." By this means the County Commissioner or any one who inspects the school may see at a glance where in the course at study each pupil is working, and what he is doing.

7th, Pupils should pass satisfactory examinations before being promoted from one grade to another. They should be promoted as soon as their advancement and ability warrant it. This system of promotion may be made an efficient incentive to pupils to finish a part of the course of study each term, and they should receive from the teacher a "Certificate of Promotion" showing their standing and grade to which they are promoted.

8th. When a pupil has completed a study and passed satisfactory examination, credit him with it in the column of "Studies Completed This Term."

9th. "The Syllabus of Classes," shows every class in each study, and the pupils (indicated by numbers) belonging to it, also the pages canvassed by each class during the term. The names of pupils belonging to each class may be found by referring to the names corresponding to each number in the column of "Names of Pupils."

10th. The first classification of any school is most difficult, and should be made with great care. Succeeding teachers should not change the classification left by their predecessors, without good reason. (See Introduction "To The Teacher.")

11th. A pupil changing from one school to any other in the county, may receive from his teacher a certificate of his standing, which will enable the teacher whose school he enters to classify him without examination. Teachers should insist upon the pupil bringing such report. If he has none, write to his last teacher,

STATE OF MICHIGAN

Department of Jublic Instruction

LANSING

To the Teachers of the State:

It is a matter of much importance that the system of keeping the record of enrollment or registration, membership, attendance, and percentage of attendance in the public schools be made as uniform as possible throughout the state. This circular has been prepared to assist teachers to understand and use the above terms. The diagram on the following page of a page taken from a school register will not correspond in all cases to the one in use in your school. However, it may be adapted to your register, as follows: If you have space only for an attendance record and none for membership, you may enter in red ink the total days' membership over the total days' attendance in your total attendance column. In this way you may keep your total days' membership distinct from the total days' attendance and at the end of the term add each set of totals to get the totals for the term.

In the case of John Andrews, he was marked "Left" on the lath day, Norah Barton on the 17th day; consequently the first pupil was a member of the school 14 days and the latter 16 days. The attendance of each was respectively 10 and 6. In the total attendance column then, you would have two entries, 14 in red ink above 10 and 16 in red ink above 6.

By following the directions given below we believe you will be able to keep an accurate record of the enrollment, membership, and attendance of your school for each term.

Very respectfully,

Very respectfully,

Thomas &. Johnson

Explanation of A

Enrollment or Registration-This means the first enrollment in the school during the term and must be recorded at the first session the

Explanation of B

Membership—A child is a member of a school from the day he enters until the close of the term unless he has been marked "Left" for one of the following reasons:

- (A) Transfer to another public school in the state
- (B) Transfer to a parochial school in the state
- (C) Transfer to another state or country
- (D) Transfer to a reform school or other corrective institution
- (E) The issuance of an employment permit
- (F) Certified notice of pupil's death
- (G) The attainment of legal age.
- (H) Any other cause for permanent removal

Explanation of C

Left—Do not mark a child "Left" for any other reason than those given here. He may be absent eight days consecutively or at intervals during the month but he is still a member of the school until you are notified that he has permanently withdrawn.

Total Days' Membership—This is the sum of the days that the child has been counted a member of the school. In the case of John Andrews, this was 14; in the case of Norah Barton, 16. The other two members of the school were counted as members for 19 days of the month. Average membership is secured by dividing the total days' membership by the number of days taught.

Total Days' Attendance—This is the sum of the number of days the child was in attendance at the school. In the case of John Andrews this was 10; in the case of Norah Barton, 6, although the latter was a member of the school 16 days of that month.

Average Daily Attendance—The total days' attendance during the month divided by the actual number of days taught during the month is the average daily attendance.

Number of Days Taught—Count only the actual number of days exhect is in a school in the case of the month is the average daily attendance.

Number of Days Taught—Count only the actual number of days school is in session. Do not include holidays or days that the school is closed on account of epidemic or any other reason. In the example given on the preceding page, Monday was a holiday, being Labor Day, therefore there were only 19 days of school in that month, and in determining the average daily membership and average daily attendance for the month of September, your divisor would be 19. If in October school was in session all of the 20 days your divisor would be 20. If school is closed for part of the day, count the attendance the same as for both sessions and count the day as one that school was in session.

Percentage of Attendance-Divide average attendance by average membership. Enrollment should not be used as the divisor in this

Referring again to our example on the preceding page and reviewing the several items, you will note that the total enrollment for the month was 4, total number of days taught was 19, total daily membership was 68, total daily attendance was 51, average membership (68 divided by 19) was 3.5 plus, average attendance (51 divided by 19) was 2.6 plus, and percentage of attendance was 75 (2.6 plus divided by 3.5 plus.) To figure the average membership and average attendance for a term, get the total days' membership and total days' attendance from your monthly totals and divide in each case by the actual number of days school was in session. Divide the average attendance for the term by the average membership for the term to secure the per cent of attendance for the term.

Your register is closed at the end of the first term. Your enrollment for the new term is the same unless new pupils enter the school at the beginning of the second term. In that case they are counted as new registrations or enrollments and the record kept from the time they enter school just as you kept the record the first term. Remember that your registration is an increasing number. It never diminishes. John Andrews and Norah Barton were counted as part of the enrollment of the school in the diagram for the entire time although each one of them left during the first month.

If pupils enter your school during the year and you find they have been enrolled in some other public school of the state before they

If pupils enter your school during the year and you find they have been enrolled in some other public school of the state before they came to your school, it is well to keep a record of this. Mark them as a transfer from some other school. The state report blanks ask for the number of pupils received in transfer from other schools. (OVER)

M. Egan Teacher

REPORT OF WORK OF EACH GRADE

7th Gr. has covered work designated in the outline for this country, have gone farther than necessary in History and grandmar but should review and start where 8th gi. is supposed to next year.

The 6th grade which is no: 4 and marked 5th +6th for this year, is a very irregular pupil, has recited with by herself all year in Min think, she could do the work another year, thich now 7,8, and 2 will do. (this yes yth gr.) The only to the gr. work taken this year was Read., Hist in day tropped (Entered let geof toward last of yr.)
The 4th Gr. are in good shape to enter 3th in every roay.
except ors. 9, who was obliged to be absent geo which I Johnsold try to have him keep up if possible. no. I is ready for 6th getg. and should recite with nt. 4 and 16 if possible. Nor. 7, 8,9 and 14 recited lang. Together are advanced for 4th Gr.

The 2nd gr, are all ready for 3rd. Read from 3rd. Reader about a month no. 11, is a little slower than no. 13. no 17 who entered in spring is also in this grade. The 5th gr. no 16 entered in spring seems to be weak in arith. passed conditionally to to the gt, but think he could recite to advantage with 5th ireport OF WORK OF HOPVEDENL PUPPLS of the gr. expecially as they are advanced in some subjects.

no. 2 is very backward, should really not be classified where she is, has sort of drifted along, don't think any thing would be gained by fouthing her back. I have helped the to get what she could as she went along, but some this, are entirely beyond her grants. are entirely beyond her granfo.
No. I is also a problem, teacher much use her own
judgment, as I pointed out before think in ame ways
she blockly be put with 5th fr. in arith. next yr. but it might
discourage her entirely, and think if teacher has time
the might better racite alone although the might gove practically the same ground. Has large geography, but doesn't seem to grasp the subject at all, trees hard enough in her way I should try to have her recite geog with ho. I, and I've will begin that book in fall. Did 6th Gs. language work this year but don't think she uned do the Grahman another. Thouldn't be told to bry a lat a new book to teacher has tried her out.

all others are regular.

The "number of days school" is the number for which a legally qualified teacher was paid and includes legal holidays, institute days and any time school was closed on account of contagious diseases. All pupils belonging to the school at the time are counted as present on such days when making the report on total days attendance. To find average attendance, divide the total attendance by the number of days taught.

To find the average membership, see explanation of the above data on Model Attendance and Register, page 1 (State Superintendent's Directions).

The year's totals are computed from the reports of all the terms for the Director's use in making his annual report for the Superintendent of Public Instruction.

The year's totals are computed from the reports of all the terms for the Director's use in making his annual report for the Superintendent of Public Instruction.

The teacher is not public to full our most believe that the superintendent of Public Instruction.

The teacher is not entitled to full pay until all reports have been made to Director and Commissioner.

and Classification

19 25 Total Days Taught 178 M. Gan Teacher and Ending May 22, REPORT OF WORK OF EACH GRADE (nos. I and 3 moved away. No. 2 passed in all 7th Gr. subjects last year. Gave work as outlined but think doubtful if she passes. no. 4, 5, 6 should be classified as 7th grade next year no. 4 has taken 7th Phys. this year and both 4 and 6 have done 5th arith. and are no better than no 7 in 5th grade. In fact no. 5 is not any too well prepared to do 7th arith. but has improved a great deal this year. No. 4 + 6 should take 6th arith. next year. has done with Language this year. No. I in good shape to enter to the last year was out on account of sichness and is a slow pupil any way. failed in arith. and geog. Can probably go along with no. I in other subjects. year ago when she came here but I did not consider her fit to enter 4th last year. no 9. is a slow fourful passed his 3rd examinations fairly weel but do not know how well he may do in 4th requires patience and thorough. 2nd, no 17, here only sweeks, think she can do 3rd growth. No. 16, 17, 18 are good first graders, entirely ready for 2 nd. No. 13 is rather peculiar, will not talk to strangers, did not succeed in getting him to recite in class tief after holidays. has just finished Primer but, probably should review it some before entering 1st reader. No. 19, treat as a beginner No. 20, classified as 4th gr. in Kal. schools: good reader but seems very backward in every thing else. Should be classified as 4th gr. another year. mother approves.

on account of contagious diseases. All pupils belonging to the school at the time are counted as present on such days when making the report on total days attendance.

To find average attendance, divide the total attendance by the number of days taught.

To find the percentage of attendance, divide the average attendance by the total enrollment.

To find the average membership, see explanation of the above data on Model Attendance and Register, page 1 (State Superintendent's Directions).

The year's totals are computed from the reports of all the terms for the Director's use in making his annual report for the Superintendent of Public Instruction.

If the term reports have not been made out, the teacher should compute them.

The teacher is not entitled to full pay until all reports have been made to Director and Commissioner.

The teacher is not entitled to full pay until all reports have been made to Director and Commissioner.

Teacher's Report to Successor

Give suggestions and Recommendations in Reference to the Work of Classes, or Individual Pupils, Reviews, Promotion, etc.

Do not think it necessary to fill in this column in detail. Have followed outline as closely as possible, and if teacher does the same, with the exceptions I have pointed out in another column, rvill find no trouble getting started. I shelling, also with and 8th I combined 5th & 6th Spelling, also 6th and 8th The 5th and 6th Language hecited Together also and reviewed everything completely. Think perhaps no I could go on with, 4.5 and 6, in 7th Grammar Mo. 8 who failed in arith and geog would hardly be able to do this. No. 20 should be classified as the Grade next year and I think perhaps it would be well to put no 8 with him in some things, both are very weak in arith but no. 20 is capable of going much faster than no. 8 If he tries. no. 8 if he tries. no. I has done very well in 3rd. Gr. but is slow can do his arithmetic etc, when he understands what it means. his reading keeps him back. Have started 4th Reader and did fairly well in it. no. 13. needs to be handled with care, is smart and bright but on account of not reciting for the first part of the year is believed the rest of his class. Do not benow how to advice any one about him. Think best to go easy on the start. Howe got him so he will read and answer questions in to me outside of school would rather not or shake his head. Talks with other children all right

REPORT OF WORK OF EACH GRADE

1th Gr. No. 2 moved away. No. 1 + 3 completed work in 7th grade in every thing but arithmetic. arithmetic. 5th. No. 25 just moved here, but had good marks in city school so I think she should pass to sixth grade.

4thler. No. 5 and 6 have completed everything in 4th gr. work. 3rd In. No. 26 just moved here and had good marke in city school and think he can do 4th gr. work.

1st graind beginners. No. 15 was home sick with whooping cough nearly all writer. No. 17 is all ready for 1st reader. No. 27 jus moved here and has not completed primer yet.

REPORT OF WORK OF INDIVIDUAL PUPILS No. I has had to stay home and work, so she has not done her work in school as good as she should. arithmetic is very hard for her to understand.

No. 5 has tried to make up back work in arithmetic and think if he works as hard next year as he has this, he can be up with his grade. No. 25, 26, and 27 have not been here long enough to judge what they can do, but thought best to promotion their marks from city schools.

on account of contagious diseases. All pupils belonging to the school at the time are counted as present on such days when making the report on total days attendance.

To find average attendance, divide the total attendance by the number of days taught.

To find the percentage of attendance, divide the average attendance by the total enrollment.

To find the average membership, see explanation of the above data on Model Attendance and Register, page 1 (State Superintendent's Directions).

The year's totals are computed from the reports of all the terms for the Director's use in making his annual report for the Superintendent of Public Instruction.

If the term reports have not been made out, the teacher should compute them.

The teacher is not entitled to full pay until all reports have been made to Director and Commissioner.

Teacher's Report to Successor

Give suggestions and Recommendations in Reference to the Work of Classes, or Individual Pupils, Reviews, Promotion, etc.

All grades seemed to be behind in arithmetic. Howe succeeded in getting 4th gr. up with their work as outlined in Course of Study. It outle suggest that 6th and 7th begin studying phonics the first of year as they don't know anything about this work. This work so as to be ready for examination next year.

The class if beginners were very irregular in attendence so could not accomplish as much as his they had been more regular in attendence. Some were quite young and some livere sick, but have them ready for first reader.

I think if the 7th gr. passes the examination that, no. 3 can be made to work harder, but is growing so fast that he is inclined to indolent and careless.

No. 1 wants to do the work, but seems to be tired from home-work.

I am not sure that No. 25, 26727 can do the work of next higher grade, but think best to tothem. They do not seem to know the work in their grades very well but had such good marks in city school thought best to promote them and let them try it.

A Register of Attendance in the Public Schools of School District No.

REPORT OF WORK OF EACH GRADE

No. 1 Moved away. No. 15. enrolled late but is very good. He has not completed framer but think he is ready for 1st grade. No. 16 also enrolled late. He is slower. Has purched prefrimer ready for fumer but not 1st grade. no. 17. is absent so much she can not as me I do not think she is ready for 1st grade wark No. 18

Thate. Nos 2, 3, 4, 45 are ready for 2nd grade tworks. No. 2. is more backward in numbers than 3, 4, or 5. No. 3. is not so good in reading Drade. Nos 6, 4 7. are ready for 5th grade. Have completed the grade work in weighing No.7. is weak.

Frade. no. 8 & 9. have completed 5th grade work in every thing

no. 9. is a very poor reader. - Irade no. 16 +11 have completed 6 grade work as outlined by I grade mo 12 is weak. Drug dependent. Trade. no. 12, 13, 814. have completed the work buttined by state course of steely Will write on examinations no. 13. is absent so much on account of home work. no 14 is carelies with papers on all wretten wash and

REPORT OF WORK OF INDIVIDUAL PUPILS

No. 17 is absent a great deal. She is a good worker when she is here. no. 16. has overcome his hetred for school and started to work better, but has only completed pre primer. No 15 remembers well and is very bright. no. 5 is good. no 3. is weak in spelling. no 2 is week in numbers. no tes putty fair. no b. is week in reading. For upo may have some effection her reading. no 7. is weak. loss not seem quite sure of himself in any thing. no. I is very foor in reading end he is very slow to more about any thing. He remembers well and I think he is pretty good in arithmetro. No 9, co slow to understand arithmetre good in every thing else. No.10. is good in every thing. Not a very good reader, but much improved from the beginning of the exear! No! is a good reader but down not seem quete sure of kersely in any thing else!

No. 12 is fair in every thing. No. 13. is poor in arithmeter. fair you the rest of her subjects. Harle well rolen she is

here but she is at form so much that she can not get y whole lot out of her work. No. 14 jes poor in writing. his willes work is not good But he is very high otherwise

nos 2, 13 + 14 wall write on examinations.

			NO	OTES			

The "number of days school" is the number for which a legally qualified teacher was paid and includes legal holidays, institute days and any time school was closed on account of contagious diseases. All pupils belonging to the school at the time are counted as present on such days when making the report on total days attendance.

To find average attendance, divide the total attendance by the number of days taught.

To find the percentage of attendance, divide the average attendance by the total enrollment.

To find the average membership, see explanation of the above data on Model Attendance and Register, page 1 (State Superintendent's Directions).

The year's totals are computed from the reports of all the terms for the Director's use in making his annual report for the Superintendent of Public Instruction.

If the term reports have not been made out, the teacher should compute them.

The teacher is not entitled to full pay until all reports have been made to Director and Commissioner.

Teacher's Report to Successor

Give suggestions and Recommendations in Reference to the Work of Classes, or Individual Pupils, Reviews, Promotion, etc.

All grades have covered work putlined in course of steely.

Beginners Came at different times 7005. 16,17,175, are not ready for

yelet grade. Theor provided this out in another columns.

No grades have been combined in their work the atternated

daily rentations instead tryp Beg. & 1, & grade Language classes were

called together.

No.19. The only here here 3 weeks, but Daw seen she is capable of

long 3rd gode work next year.

Carable of doing 3 grade numbers & Spelling but not

reading. (They covered per reading & to page 54 in

second reader. You may put them when you please

but they have covered 2 nd grade work in mumbers.

and fatt of the spelling.
